LEASING PROGRAM

Leasing is a great alternative to a one-time outlay of cash. It provides a way for you or your dealer to purchase computers, office equipment, machine shop equipment and vehicles. The revenue generated or saved from using the equipment should more than cover the low monthly lease payments. By using a lease, your liquid assets remain available to help you grow your business or to cover a short fall in case of a downturn in sales. Most leasing payments are treated as fully deductible business expenses.

How to use the lease program:

Direct administration of the programs will be by WOLCO Financial Services. Their people are immediately available at 800-487-3636 to assist you in arranging financing or to answer questions regarding the financing programs. Just mention you are with the Auto Pride organization. WOLCO also offers tool and equipment sales training.
